

VITAFARM® PREMIUM CALF MILK REPLACER

SKU: N/A | Category: [Vitafarm](#) |

Active Constituents: Superior quality milk powders, high performance Vitamin and Mineral mix including vanilla flavour, Manganese, Manganese Organic, Vitamin A, Iron, Iron Organic, Vitamin D3, Zinc, Zinc Organic, Vitamin E, Copper, Copper Organic, Vitamin C, Cobalt, Choline, Selenium, Vitamin B6, Magnesium, Vitamin B12, Folic Acid, Thiamine, Riboflavin, Nicotinic Acid, Pantothenic Acid, Biotin, Iodine, Lasalocid (Bovatec®) and Safmannan®.

Directions for use: How to prepare feed: To achieve the best results, first add Vitafarm CMR to half the required volume of fresh, clean water, warmed between 38 - 40°C. Once fully dissolved, add the remaining balance of water and stir until homogeneous. Example - if mixing 2 litres: - Add recommended quantity of Vitafarm CMR to 1 litre of water - Mix until fully dissolved - Add remaining

Age (days)	Volume of warm water per feed per calf / grams of Premium CMR
------------	---

0 - 3	Colostrum recommended
-------	-----------------------

3 - 10	2.0 litres / 125gm per litre
--------	------------------------------

11 - 20	3.0 litres / 130gm per litre
---------	------------------------------

21 - 40	3.0 litres / 135gm per litre
---------	------------------------------

water being 1 litre and stir until homogeneous Twice Daily:

Age (days)	Volume of warm water per feed per calf / grams of Premium CMR
------------	---

0 - 3	Colostrum recommended
-------	-----------------------

3 - 10	Recommend twice daily feed
--------	----------------------------

11 - weaning	3.0 litres / 250gm per litre
--------------	------------------------------

Once Daily: _____ **Feeding Guidelines:** - Vitafarm recommend Colostrum to be fed for the first 3 days. - Supply clean, fresh water at all times. - Good quality straw and meal or pellets should be supplied from 5 days of age. - With careful attention and care, once a day feeding is possible. The Milk replacers should be fed in a concentrated form (250grams per litre) and at a higher volume to ensure calves receive all their nutritional requirements. - Changes to the volume of feed should be made gradually. Do not overfeed. - Ensure all equipment used in preparation and feeding is hygienically cleaned prior to use. - Total Stockfeeds feeding recommendations are to be used only as a guide. Exact volumes fed are dependent on the weight and breed of the calf. **Management Tips:** - Provide calves with a clean, dry environment that provides shelter from draughts. - Ensure animals have sufficient space and that they are housed with animals of a similar size and weight, in groups of between 6 and 8. - Address and isolate any sick animals immediately.

Pack Sizes: 20KG

Precautions: NOT TO BE FED TO DOGS, HORSES OR OTHER EQUINE SPECIES. Accidental

consumption of lasalocid or monensin medicated feed should be avoided. May prove fatal if fed to equids. **DO NOT FEED TO NEWBORN CALVES WITHIN THE FIRST 24 HOURS OF LIFE.** Excessive consumption of ionophores or use within first 24 hours of life may result in ionophores toxicity in young calves. Concurrent use of milk additives that contain ionophores (lasalocid or monensin) should be avoided or carefully monitored. - This product is specifically formulated for animals as described. - This feed is unsuitable for human consumption. - The manufacturer accepts no responsibility if this product is utilised in incorrect quantities or conditions other than those recommended by the manufacturer. - Vitafarm Premium Calf Milk Replacer contains Bovatec and is Calf Specific. This feed has been specifically formulated for animals as described and must not be used for other species of animals.

Storage: Store under cover in a cool, dry, rodent free place below 30 degrees celcius away from sunlight. For maximum freshness we recommend that Vitafarm Milk Replacers to be used within 12 months of the date of manufacture.
