Supports hoof health & immunity with Zinpro® Performance Minerals

Custom Prebiotics and Probiotics for gut health

Added Lactoferrin to stimulate immunity

FAT **16%** PROTEIN **22%**

## FREQUENTLY ASKED QUESTIONS (FAQS)

### WHAT FOALS CAN I FEED PROFELAC FOAL TO?

ProfeLAC Foal is designed specifically for orphaned, rejected, weak, or fast-growing foals when mare's milk is inadequate or unavailable. It is suitable for use across Thoroughbred, Standardbred, and Performance Horse studs, as well as by riding schools, smaller breeders, and veterinary clinics.

### IS PROFELAC FOAL DIFFERENT FROM GENERIC MILK REPLACERS?

Yes. Unlike generic milk replacers, ProfeLAC Foal is formulated to mimic mare's milk. It is designed with higher whey than casein for a protein-fat balance that closely matches mare's milk, making it more digestible and suitable for foals. It also includes Lactoferrin, Omega-3 fatty acids, and Zinpro® minerals for superior immunity, growth, and hoof health.

### HOW DOES PROFELAC FOAL SUPPORT A FOAL'S IMMUNE SYSTEM?

A foal's immune system is vulnerable in the first weeks of life, especially if colostrum intake is limited. ProfeLAC Foal contains Lactoferrin, a natural component of colostrum that stimulates both innate and adaptive immunity. This works alongside probiotics, prebiotics, and chelated minerals to help the foal fight infections, reduce the impact of stress, and build resilience. This multi-layered support system is one of the key reasons breeders and vets choose ProfeLAC Foal over generic alternatives.

### CAN PROFELAC FOAL HELP REDUCE THE RISK OF SCOURS?

The formula includes probiotics and prebiotics that support gut health and reduce the incidence of scouring in young foals.

### CAN I FEED PROFELAC FOAL TO OLDER MARES OR HORSES?

Yes. ProfeLAC Foal can be added as a supplement to support older mares or horses in times of stress, recovery, or when extra condition is needed. However, it is not a complete feed and should only be used as an additive to their regular feed, not the sole source of nutrition.

### WHAT IS LACTOFERRIN?

Lactoferrin is a natural glycoprotein found in mare's colostrum. It helps stimulate the foal's innate and adaptive immunity and has antiviral, antibacterial and anti-inflammatory benefits.
