

PROVICO ENHANCE

WHOLE MILK BALANCER / EXTENDER

Enhances the nutrition of whole milk and surplus milk programs

- ✓ Better balances fat and protein to maintain growth and encourage mammary development
- ✓ Lifts protein percentage to encourage solid food intake
- ✓ Provides flexibility and consistency to milk programs
- ✓ Easy to mix formulation

PROVICO ENHANCE is a premium milk powder designed to be used in conjunction with whole milk.

The unique formulation better matches the high fat of whole milk with higher protein to maintain ADG, improve solid feed uptake, and encourage better mammary development.

FREQUENTLY ASKED QUESTIONS (FAQ'S)

CAN I USE PROVICO ENHANCE AS A COMPLETE CALF MILK REPLACER?

No, PROVICO ENHANCE is designed to build on and balance the nutrients already present in whole milk. PROVICO ENHANCE should only be used to make up 50% of the milk DMI. If more than 50% of the milk DMI is required from milk powder, we recommend using a complete CMR from the ProfelAC range.

WHY SHOULD I USE PROVICO ENHANCE AS A FORTIFIER OVER A PROFELAC MILK REPLACER?

The ProfelAC range is designed to be used as a complete milk feed. While each product can be used as a fortifier, PROVICO ENHANCE has been specifically designed as a fortifier to better balance and utilise the fat and protein contained in whole milk.

DOES PROVICO ENHANCE CONTAIN ANY ADDITIVES OR VITAMIN/MINERAL PREMIXES?

No. PROVICO ENHANCE deliberately doesn't contain additives or premixes; only high-quality fat and protein - the essential nutrients a calf needs to grow and thrive.

DOES PROVICO ENHANCE REPLACE ANY OTHER PRODUCT?

No, PROVICO ENHANCE is the first product of its kind in Australia. It was designed to fortify whole milk and extend the volume of surplus milk available, avoiding having to steal milk from the vat.
