# HEALTHY CALF MACRO

Healthy Calves. Healthy Cows.™

## WHY HEALTHY CALF MACRO PREMIX?

HEALTHY CALF MACRO has been specifically formulated for the needs of dairy replacement heifers. This calf premix, when added to calf feed, assists with the prevention of deficiencies of essential nutrients (vitamins, organic trace minerals, calcium & phosphorus), aids fibre digestion and feed conversion, supports immune function, aids odour control, and provides Bovatec for the control of coccidiosis and for improved liveweight gains and feed conversion efficiency in growing cattle.

## THE HEALTHY CALF MACRO DIFFERENCE

- ▶ Formulation based on local development and innovation
- ▶ Proven use in dairy calves nationwide
- ▶ Tailored nutrition solution with dependable results
- ▶ Available from leading rural resellers and feedmills nationwide

## BENEFITS

- ▶ **Application** – convenient all-in one concentrate for dairy replacement heifers
- ▶ **Performance** – comprehensive dietary supplement to maintain calf health and performance
- ▶ **Price** – premium product for high value dairy heifers – you get what you pay for!

## THE HEALTHY CALF MACRO ADVANTAGE

**HEALTHY CALF MACRO** is a medicated dietary supplement containing vitamins, organic trace minerals, calcium, phosphorus, canola meal, Yucca extract, live yeast and Bovatec® to maintain dairy calf health and performance.

### LIVE YEAST - ACTISAF SC47\*

High Dose (10b CFU/feed) ActiSaf supplementation is proven to stimulate and maintain the activity of essential rumen microbes, necessary to aid forage digestion and reduce negative impacts of dietary changes for growing calves.

Multi-site trial data using the optimum 1g (10bCFU) daily application rate vs controls have repeatedly shown:

- 24% improved growth rates = hit target weights earlier
- 18% improved feed conversion = get more out of your starter feed
- Accelerated microbe colonisation - early rumen microbial activity

\* For further information refer to: *The ActiSaf difference in calf starter muesli*

### BOVATEC®\*

Contains Bovatec for the control of coccidiosis and reduction of faecal shedding caused by *Eimeria bovis* and *Eimeria Zuernii* in growing cattle and for improved liveweight gains and feed conversion efficiency in growing cattle.

\* For further information refer to: *BOVATEC - A head start on results*

### ORGANIC TRACE MINERALS

Five organic trace minerals including: Zinc, Manganese, Copper, Cobalt and Selenium for their roles in a diverse range of enzyme and metabolic functions and the health of various tissues and organs. Contains OrganoTrace® minerals for improved bioavailability and absorption in cattle.

### VITAMINS

Contains vitamins A, D3, E and B1 for their diverse role in metabolic functions.

The primary function of Vitamin D is to elevate blood calcium to a level that will support normal mineralisation of bone as well as other body functions. It is well known that Vitamin D3 or cholecalciferol – the active form of Vitamin D – stimulates active transport of calcium from the gut to the blood stream.

Vitamin D3 is included for its influence on improved calcium absorption.

## DIRECTIONS FOR USE

### DAIRY CALVES

**Mixing Rate:** 10kg per tonne of feed.

Daily supplementation in the feed.

### PACKS

20kg Bag | 50 bags per pallet

### ESI & WITHHOLDING PERIODS

NIL

### DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL
