

Rapidly...

BOVELYTE™

Healthy Calves. Healthy Cows.™

WHY USE BOVELYTE?

BOVELYTE is a non-antibiotic, hypertonic electrolyte solution to replace electrolytes, aid in the reversal of dehydration and supplement both energy and vitamin needs in calves, lambs and kids.

Designed for sick calves requiring a rapid-acting and high-dose alkalising electrolyte to address base-deficits.

THE BOVELYTE DIFFERENCE

- ▶ Formulated based on current veterinary research and manufactured using innovative ingredients
- ▶ Tried, tested and proven across AUS
- ▶ Unsurpassed product quality, performance and on-farm infant animal rearing support
- ▶ Endorsed by leading professionals and specialists
- ▶ Available exclusively from veterinary clinics nation wide

BENEFITS

- ▶ **Application** – high alkalising formulation ideally suited for severely dehydrated and acidotic calves (on veterinary diagnosis)
- ▶ **Performance** – balanced formulation; quickly addresses base-deficits and replaces fluids and electrolytes
- ▶ **Price** – exceptional value versus other commercial alternatives

THE BOVELYTE DIFFERENCE

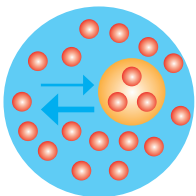

BOVELYTE is an oral, non-antibiotic, hypertonic energy, electrolyte and vitamin supplement for calves, lambs and kids.

ALKALISE

BICARBONATE FORMULATION

Although all alkalising agents have similar effects, bicarbonate has the key advantage of being the most rapid-acting alkalizing agent, necessary for addressing base-deficits. Best practice is to use BOVELYTE over shorter treatments periods of several days.

HYPERTONIC SOLUTION

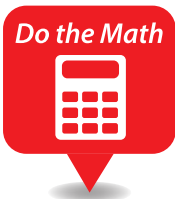

Commercial electrolyte preparations vary in the amount of particles dissolved in the solution. Most products are “hypertonic” containing a very large amount of glucose in the preparation. Hypertonic and high-alkalising formulations are best for severely dehydrated calves.

STRONG ION DIFFERENCE (SID)

“Strong ion theory” encourages the use of products that deliver an excess of strong cations (sodium and potassium) relative to the concentration of strong anions (chloride) in order to help correct a portion of the acid-base balance in the blood.

While most over-the-counter commercial products fall well short of the required SID range, all ProviCo electrolyte formulations (including BOVELYTE) comply with SID recommendations, providing a balanced formulation to address acid-base balance.

EXCEPTIONAL VALUE FOR MONEY

BOVELYTE powder provides up to 40% more doses per kg than other commercial electrolyte powders. Veterinarian and farmer feedback confirms BOVELYTE provides application, performance and price benefits.

Do the math, make the switch, and benefit from BOVELYTE.

DIRECTIONS FOR USE

FEEDING RATES

Refer to product label and feed according to veterinarian instructions.

BEST RESULTS

As a supportive measure during times of disease, stress, ill-thrift and gastric upset add **FortiMILK® GREEN** to all electrolyte feeds.

PACKS

2kg, 4kg, 10kg and 20kg Pails

ESI & WITHHOLDING PERIODS

NIL

DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL
