APVMA Approval Number: 65691/51590
(Australian Pesticides and Veterinary Medicines Authority)

Viral FX™ One Shot Bio-Disinfection

ViralFX™ is the disinfectant of choice for Government's keen to secure their farm animal and border Biosecurity. Its unique formulation gives the widest proven spectrum of activity of any disinfectant available.

- Shelf life - 3 years (date of manufacture). Excellent stability.
- **ViralFX™** kills - 100 strains of virus, 400 strains of bacteria & 500 disease causing pathogens.
- Highly effective - hard water, porous surfaces, low temperatures.
- When used at dilutions of 1:1000 (0.1%) it is safe and suitable for animals to drink water treated with **ViralFX™**.
- With **ViralFX™** versatility, producers can 'Have Peace of Mind' for a change and rely on the single pack of **ViralFX™** to ensure the efficacy of their biosecurity.
- **ViralFX™** is an important component of any Biosecurity program in the aquatic area - fish, shrimp, aquaculture facilities and zoos.
- **ViralFX™** has been designed to be used as a single product for use in aquaculture as well as well for use in the production of poultry, swine, cattle and other types of agriculture.
- A 1% solution of **ViralFX™** is recommended as a "one step" cleaning and disinfecting procedure for all surfaces, equipment, instruments, utensils and cages - associated within Veterinary, Agriculture, Aquatic production and Humane society facilities.
- **ViralFX™** - Suitable for Aerial Spraying, Misting and Fogging.
