THE ProfELAC ADVANTAGE

ProfelAC NURTURE is a Low Lactose Milk formula designed for hand-rearing all animal species during any stage of life including orphaned milk feeding infants to older animals requiring extra nutritional support.

THE NEW BENCHMARK

Recognised as the industry's specialist in infant animal health and nutrition, ProviCo Rural is Australia's leading manufacturer and supplier of infant animal milk formulations and specialty nutrition products with its flagship brands ProfelSTART and ProfelAC.

Following extensive research and development the latest industry benchmark for low-lactose milk supplementation is available in the trusted ProfelAC brand.

LOW LACTOSE INGREDIENTS

Lactase Enzyme Deficiency – a number of young animals are intolerant to the milk sugar, lactose, which usually results from a deficiency in the enzyme lactase, which breaks down lactose into smaller sugars for absorption. Wildlife species and some domestic pets are intolerant to lactose and therefore require a low-lactose milk formula to thrive. Nurture contains various ingredients to ensure a low-lactose formulation.

TECHNICAL SUPPORT

ProviCo infant specialists all have infant-rearing experience with ruminant nutritionist and technical support.

The ProviCo infant team offer practical rearing advice for rearing calves, foals, lambs, kids, crias, fawns and other farm or wildlife animals.

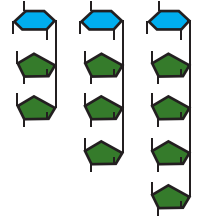

ENERGY BOOST

Media Chain Triglycerides (MCT) – a type of fat that acts more like sugar which gets absorbed rapidly and delivered directly to the liver for an extended energy boost. Acts as an Energy Boost within 2-6 hours after ingestion.

PREBIOTIC - FOS

Fructo Oligosaccharides (FOS) – selectively feeds beneficial bacteria in the digestive system maintaining optimum gut health.

BIOPAK™ PREMIX

A unique proprietary blend of vitamins, OrganoTrace® minerals to support vital metabolic functions, and additives specifically selected to boost energy and immunity.

MULTI-SPECIES

ProfelSTART Colostrum Supplement has been specifically formulated for domestic (calves, foals, lambs, kids, crias, fawns) and wildlife species.

ProfelAC FEEDING GUIDELINE

Dilution A (2,827KJ/L)

1 level scoop (10g) to 60mL warm water. For 1 litre add 13 level scoops (130g) to 900mL of warm water.

Dilution B (4,350KJ/L)

1 level scoop (10g) to 40mL warm water. For 1 litre add 20 level scoops (200g) to 900mL of warm water.

FOALS, CALVES, KIDS, FAWNS:

Feed Dilution A throughout milk feeding period.

LAMBS, CRIAS, WILDLIFE ANIMALS, PIGLETS, PUPS, KITTENS, RABBITS:

Start feeding with Dilution A and increase gradually to Dilution B over 1-2 weeks as the animal tolerates this formula.

OLDER ANIMALS:

ProfelAC NURTURE can be used as general powder or liquid supplement to support extra nutritional requirements of pregnant, lactating or convalescing animals.

PACKS: 375g Jar, 900g Jar, 5kg Pail, 20kg Bag

ESI & WITHHOLDING PERIODS: NIL

DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

THE TABLE BELOW SHOULD BE USED AS A GUIDE ONLY

Weight of the animal	100g	200g	500g	1kg
Total daily feed volume	30mL	60mL	150mL	300mL
Weight of the animal	5kg	10kg	50kg	100kg
Total daily feed volume	1L	1.6L	5.4L	9L
FEEDS PER DAY FOR THE FIRST WEEK OF LIFE				
Foals	Feed at 2-3 hourly intervals			
Calves, Lambs, Kids, Crias	2-3 feeds per day			
Pups, Kittens, Fawns	4 feeds per day
