Essentially... **FortiMILK[®] SILVER** Healthy Calves. Healthy Cows.[™]

WHY FortiMILK SILVER?

Whole milk fails to meet the basic vitamin and trace mineral requirements of young milk-fed calves. Your calves are counting on you to supply their basic micro-nutrient needs. These can be met by supplementing whole milk with FortiMILK SILVER. Specifically designed to supplement the daily micro-nutrient requirements of pre-ruminant calves and aid growth potential.

THE FortiMILK BENCHMARK

- Medicated formulation based on global calf research, development and innovation
- Tried, tested and proven across AUS
- Unsurpassed product quality, performance and support
- Endorsed by leading professionals and calf specialists
- Available from leading rural resellers nation wide

BENEFITS

- Application easy-to-mix; convenient all-in-one product
- Performance prevent and control coccidiosis; improve calf condition and growth rates
- Price best value for essential comprehensive cover

ACTIVE CONSTITUENTS

FortiMILK SILVER contains BioPAK® SILVER-a proprietary blend of:

BOVATEC®

For increased live weight gains in calves and heifers. Bovatec® has been shown to control the clinical signs of coccidiosis and reduce faecal shedding of *E. zuernii* and *E. bovis*. When coccidiosis is controlled, calves are more likely to reach their full potential.

ESSENTIAL VITAMINS

13 essential vitamins including: Vitamin A, D, E, C, B-group and Biotin for their role in a diverse range of enzyme and metabolic functions and the health of various tissues and organs.

ESSENTIAL TRACE MINERALS

Seven inorganic trace minerals including: Zinc, Manganese, Iron, Copper, Cobalt, Selenium plus lodine for their roles in a diverse range of enzyme and metabolic functions and the health of various tissues and organs.

PROBIOTIC (MAINTENANCE DOSE)

A unique blend of microencapsulated, live (viable), naturally occurring microorganisms. An ideal inhabitant of the digestive tract due to its ability to survive harsh conditions and to thrive once they reach the small intestine. Produces large quantities of digestive enzymes to aid digestion of feed when nutrients arrive in the small intestine.

PREBIOTIC

Derived from yeast cell walls, the functional oligosaccharide prebiotic MOS, binds to intestinal pathogenic bacteria and prevents their colonization in, and attachment to, the gastrointestinal tract.

YEAST

Live yeast stimulates activity of beneficial bacteria (probiotics) in the gut of pre-weaned calves, has a supportive role in immune function and aids digestion.

DIRECTIONS FOR USE

CALF DOSE

Calf Bodyweight (kg)	30-35	35-40	40-80	>80
Daily Dose (g)	7.5	10	10	10

PROVICO CALF MILK ADDITIVE PROGRAM

Healthy Calves.

Healthy Cows.™

Day 1	Add 5mL/head of BioStart CALF to first colostrum feeds to ensure colostrum curd, improve colostrum digestion and release antibodies for passive immunity transfer	
Day 2 - Weaning	Add FortiMILK SILVER to whole milk or unmedicated calf milk replacer (refer to calf dose table)	

NOTE: As a supportive measure during times of disease, stress, ill-thrift and gastric upset, add **FortiMILK GREEN** to all electrolyte feeds and/or can be added to milk feeds for the first 2-3 weeks of life.
